OLD COLONY NURSERIES, PLYMOUTH, MASS., U. S. A.

HOME OR FOREIGN ORDERS FILLED WITH THE UTMOST CARE AND PROMPTNESS.

DEAR SIR:—I have the pleasure of handing you my Price-List of Trees, Shrubs, Plants, etc. Plants packed for Europe with great care. I give you the benefit of the lowest prices and hope to have your orders in full.

To persons about to ornament their grounds, I shall be happy to show the extensive plantations here, agreeably laid out in the modern style, covering fifty acres, containing many thousands of the leading hardy Ornamental Trees, Shrubs, Evergreens, Fruits, etc. My plantations, now more than fifty years old, are perhaps the most extensive in New England. The Nurseries are seven hours from New York, ninety minutes from Boston.

Particular attention is called to the large number of native American plants in this list; unless noted "collected," they are nursery grown. The Herbaceous Plants are field grown; i. e., they are large specimens, not pieces grown in pots and frames.

Correspondence is solicited with persons who contemplate planting in large quantities. On orders with satisfactory references, six to twelve months in advance of the shipment of stock, very considerable reduction can be made on prices by the hundred and thousand. Plants will also be grown to order at special rates when large numbers are wanted and sufficient advance notice is given.

Please remit by check or P. O. order.

Autumn delivery begins September 15, and spring delivery begins from March 20 to April 1. If you receive more than one list, please distribute to your friends. I will send lists to any address you may send me.

Yours very respectfully,

T. R. WATSON, Successor to B. M. Watson.

Agents wanted. Terms made known on application.

Errors that may occur in filling orders should be reported to me at once, and immediate correction will be made.

Packing will be charged at cost.

From the following lists 6 will be sent at the dozen rate, ~~25~~ at the hundred rate.

Plants for Hedges and Boundary-Lines.

I have a very large and well grown stock of the hardiest and most approved hedge plants. I offer this season a splendid stock of California Privet in various sizes, now in great demand for hedging. I have also common Barberry, and purple-leaved Barberry, and the new Berberis Thunbergii from Japan, with its brilliant scarlet berries and rich crimson foliage in autumn; also the best evergreens in variety, such as Arbor Vitæ, Norway Spruce, Red Cedar, Hemlock, etc. The pure white Deutzia gracilis makes a first-class dwarf hedge. I have it in several sizes. I have fine plants of Japan Quince, Hornbeam, English Beech, Honey Locust, Lilacs, pure white and Rubra de Marly, and the lovely new Japan rose, Rosa multiflora, a most profuse bloomer with great bunches of crimson berries for Christmas, also Sweet Briers. My stock of Buckthorns is very large and fine. The best vines and climbers for running over stone walls, fences, and other unsightly objects are the Ampelopsis (sorts), Bignonia radicans, Celastrus scandens, Clematis, Honeysuckle, Periploca, running Roses, and Wistaria in several colors.

Decorative Perennial Herbaceous Plants.

These plants are all hardy and produce an immediate effect, as they bloom the first year they are planted. They should be planted in the autumn, which is the best time for planting herbaceous plants, and should be covered with a forkful of dung to protect them from being thrown out by the frost. They may be planted in the spring, also, with great success. I offer the following choice collections of my own selection, in the very finest and most useful sorts. This class of plants is fast taking the place of bedding plants, as they do not have to be renewed every year.

Collection of 12 choice sorts, all different named, \$2.50

I will furnish 1000 plants, comprising a most extensive and valuable collection of hardy and ornamental perennial plants of my own selection, for \$100; 500, \$50.

These violets are all perfectly hardy. Viola cucullata, rich blue, is very much esteemed abroad for its fine effect in plantations, forming great clumps and blooming profusely. The English violets are very sweet and should be in every garden. Schönbrunn is very fragrant and was a great favorite of Unser Fritz, and was named from his palace and grounds in Germany, where it originated.

Schönbrunn and English white are very useful to plant freely on the borders of avenues, etc., and will perfume your whole estate.

Peonies—New Chinese and Japanese Herbaceous.

Well established plants from the open ground.

I have a very large and complete collection of this gorgeous flower. Of these I offer the following assortments at very low rates. They consist of the most celebrated sorts known, and include many that are yet very rare. This is now the most fashionable of all showy, hardy garden plants, both here and in Europe.

These fine Japanese and Chinese Peonies are well known to be the most showy flowers in cultivation, and are particularly adapted to our climate. They are entirely hardy and bloom a long time. They are accordingly very much used now for large masses in cemeteries, parks, and pleasure grounds; and may be followed by Lemoine's beautiful new French Gladiolus, the stiff foliage helping to support the spikes of gladiolus. They should be planted among the peonies in May.

Plants are twenty-five cents each, your choice. 12, all different, named sorts, my choice, \$2.50. 25, all different, named sorts, my choice, \$5.00. 50, all different, named sorts, my choice, \$10.00. For cheaper plants unnamed, see below.

I have also a splendid collection of first-class mixed varieties including all the old favorites, at the following low prices:—

A collection of 12 fine plants, without names, \$1.50. A collection of 25 fine plants, without names, \$3.00. A collection of 50 fine plants without names, \$5.00. A collection of 100 fine plants, without names, \$10.00.

Tree Pæonies.

Tree peonies are shrubby sorts from China and Japan which do not die down in the autumn, but make *hardy bushes* of considerable size, bearing immense flowers of great beauty, and very showy.

TREE PÆONIA MOUTAN. Beautiful carmine rose, very large, a great bloomer. One of the most showy plants in cultivation. Should be in every collection. 75 cents each; \$6.00 per dozen.

TREE PEONIES. Queen Elizabeth, Louise Mouchelet, Glory of Shanghai, Koeclini, Victoria, and other superb sorts. \$1.00 each. My choice, \$10.00 per dozen.

Hybrid Perpetual Roses. We offer this season a fine stock of Hybrid Perpetual Roses. They are well established plants, largely on their own roots, or, if grafted, grown one year here with the worked part well below the surface of the ground. We have about twenty of the leading sorts, all good growers and giving a pleasing variety in color of the flowers. They should be closely pruned every spring, and planted deep in well enriched soil early in the season. The prices are 25 cents each, \$2.50 per dozen, \$20.00 per 100. For other desirable roses see Hardy Trees and Shrubs.

Rhododendrons. We have a good collection of the best and hardiest Rhododendrons, hybrids of *R. Catawbiense*. These are among our best and most satisfactory plants. To insure good success they must be heavily watered during July and August, giving a much greater quantity of water at one time than is usually given grass or bedding plants. In December they should receive a mulching of leaves a foot or more in depth, and a covering of pine boughs, which should not be removed until after the middle of April, when all danger from the high spring winds is past. These cultural directions should be followed also for *Azalea*, *Kalmia*, etc. Our stock contains the hardiest varieties only, those which have been fully tested in Eastern Massachusetts; we offer ten or a dozen sorts only.

Small Conifers. We wish to call special attention to our collection of rare and desirable conifers. We offer at very low prices plants, from ten to twenty inches high, well grown in light, sandy soil, and well furnished with fibrous roots. We believe that these small plants will give better results than plants of larger size, while the first cost, including transportation, is very much less. For kinds and prices see *Hardy Evergreens, Conifers*.
